

# CROSSDECKING:

*Linking up ships to exchange parts, transfer technicians, transport supplies, and share knowledge.*

## TODAY, CROSSDECKING TAKES PLACE, BUT THE DECKS ARE GLOBAL AND THE EXCHANGES ARE DIGITAL.

Yet the workforce hasn't been able to keep up: workers who bank, shop, and socialize on mobile in their personal lives find their workflow trapped on clipboards, whiteboards, and binders.

With over 40 years of military experience, Crossdeck is a mobile-first technology company that helps large- and small-distributed teams achieve more. We are facilitating a technology revolution by understanding pain points of the workforce and the technology needed to transform them. ***Crossdeck connects the world's most distributed workforces.***

### MEET THE CROSSDECK MOBILE PLATFORM

Crossdeck's mobile-first productivity platform empowers distributed teams, from executives to rank and file, with a suite of productivity applications that boost readiness, streamline processes, and unlock actionable data.

By leveraging the Crossdeck Platform, teams can quickly access our training, logistics, administration, and communications apps, or easily connect with existing tools. Workers can swipe from one application to another, integrating disparate systems into one unified workstream. This is game-changing for the tablet generation.

### CROSSDECK'S MOBILE APPLICATIONS

#### TRAINING

Crossdeck integrates training content including docs, 3D models, and MP4s into its platform while capturing the user metadata leaders need to promote safe operations and ensure procedural compliance.

#### TO-DO WORKLISTS

With best-in-breed solutions to track team tasks, Crossdeck allows access to workers' critical information within a connected platform. Use the improved communication and feedback to reprioritize your team's limited time so they can perform better work, smarter and faster.

#### MAINTENANCE

Quickly record, document, and analyze the results of inspections for distributed property and equipment. The interactive tool simplifies and speeds this process by allowing you to track, identify, and correct discrepancies on the spot.

#### ASSESSMENTS

Assessors can fill out digital check sheets on commercial mobile devices at the point of performance, with instant access to grading criteria and linked references. Team evaluations will be faster and more effective than ever before.

## QUAL

Track progress and easily identify your team's top performers. Information provided by the Qual tool helps leadership improve readiness, accelerate learning, and thoroughly understand workforce proficiency and expertise.

## SCHEDULING

No more waiting in line for computers to check your schedule or having to track down the manager to determine responsibilities for the day. Access an entire digitized schedule with key workday content anywhere, and as plans change, your team will adapt on the fly.

## SMART PDF REFERENCES

Digitized checksheets link directly to relevant items within the references. Now, instead of carrying around seemingly never-ending paperwork and searching manually for necessary procedures, on-hand search capabilities allow access to references in seconds. Better access leads to improved safety as workers find it easier to follow procedures.

## CUSTOMIZED APPS

Every agency has unique characteristics with diverse and highly talented workforces. Each module will be customized to meet your specific mission needs. Third-party API integrations are our specialty.

## MAKING MOBILE A REALITY

Innovative ideas alone do not transform a workplace. Smart implementation through people, technology, and processes is the driving factor. Organizations must fit mobile into their larger IT strategy, while still allowing mobile to do what it is intended to do: streamline daily work. We offer all the needed services, including network engineering, security, enterprise architecture, and more. Our services team helps you deploy secure enterprise solutions, leverage new data assets, and maximize your investment in mobile.

### TECHNOLOGY IMPLEMENTATION AND ADOPTION CONSULTING

Crossdeck's mobile and strategy experts help your organization go mobile, enabling senior leaders to see the possibilities, understand the investment needed, redesign workflows, and ensure successful adoption.

### ENTERPRISE CLOUD SERVICES & ARCHITECTURE SOLUTIONS

Today's government organizations need sustainable cloud solutions. Experienced Crossdeck engineers will design and build hybrid environments for your enterprise, including Software-as-a-Service (SaaS), Infrastructure-as-a-Service (IaaS), Platform as a Service (PaaS), Managed Services, and Big Data Analytics.

### CYBER-SECURITY + INFORMATION ASSURANCE AND CERTIFICATION ACCREDITATION (IA/CA)

Cyber threats are real and present; conformance to strict security plans and development of cyber threat mitigation plans are critical. Information Assurance continues to challenge organizations, and our professionals are some of the first to bring mobile to the DISA/NIST networks.

## ABOUT CROSSDECK

Crossdeck is a Service Disabled Veteran Owned Small Business (SDVOSB). Identified under a series of more than ten NAICS Codes, our company covers a wide range of services, from educational support and professional management development training to engineering and computer system designs.
